1.3 Hot weather

A few degrees below normal ambient temperature
A heat wave is a phenomenon that continues for a long time.

The Sabbath is being called. Heatwave in various places

Definitions are based on the situation of the word "kpadadashika".

What is in the World Meteorological Organization (WMO) heat wave

It is defined as a daily maximum temperature (Daily Maximum

Temperature) that rises by one degree Celsius for five or more consecutive days.

Long Period Average-Normal Temperature is a condition where the

temperature rises by 5°C or more. In India

IMD issues heat wave warning for Dakkar

To provide and to effectively combat the heat wave

Accountability Agency. The state of affairs in India.

The heat wave is defined by the temperature given by the sun.

According to the criteria: A state entity (Meteorological subdivision) is

divided into two parts, depending on the weather conditions.

The maximum daily ambient temperature for two consecutive days

was 40°C in the plains and 30°C in the hilly areas.

The state of India is changing in the face of the coming reality.

The heat wave is getting worse.

Daytime ambient temperature

Elephant's nest

Basically, the heat wave is a severe weather condition.

The average daily ambient temperature for a given period of time is

4.5°C above the normal temperature.

A typical heat wave with a temperature rise of 6.4°C is considered an extreme heat

wave, and if the temperature rises above 6.4°C, it is considered an extreme heat wave.

(Severe Heat Wave) can be called.

Atmospheric

The

Thank you very much.

conditions in coastal areas

heat experienced with high humidity

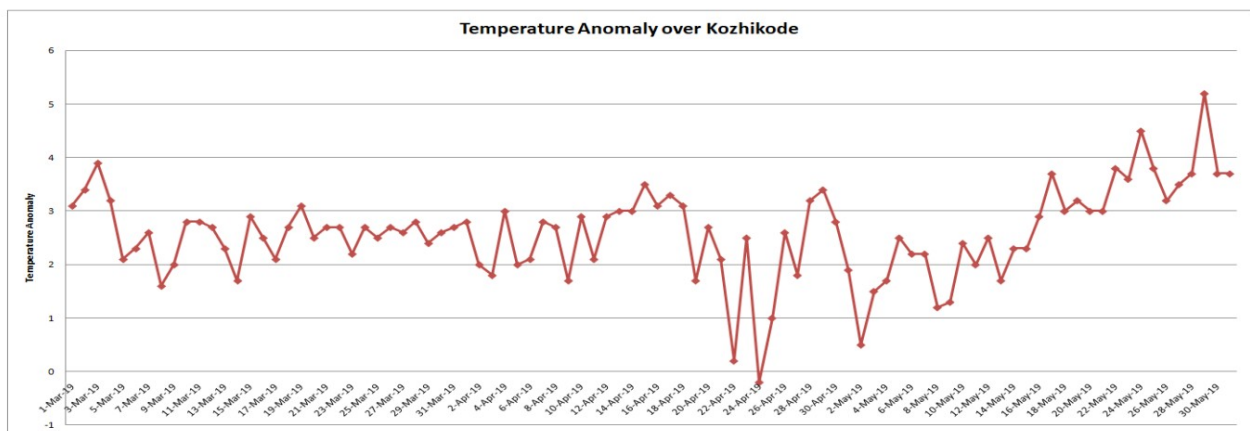

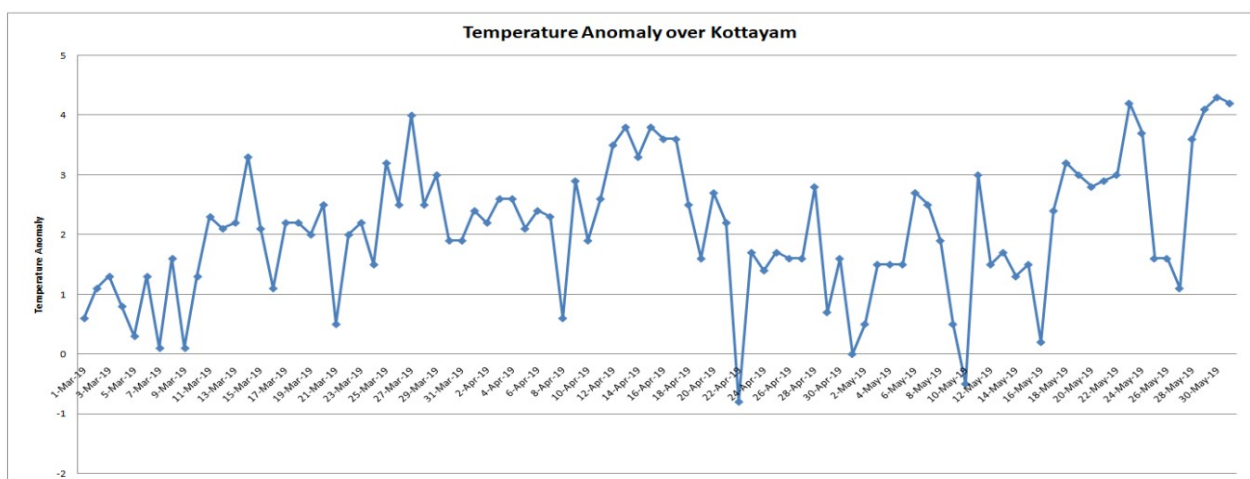

It plays a crucial role in raising the

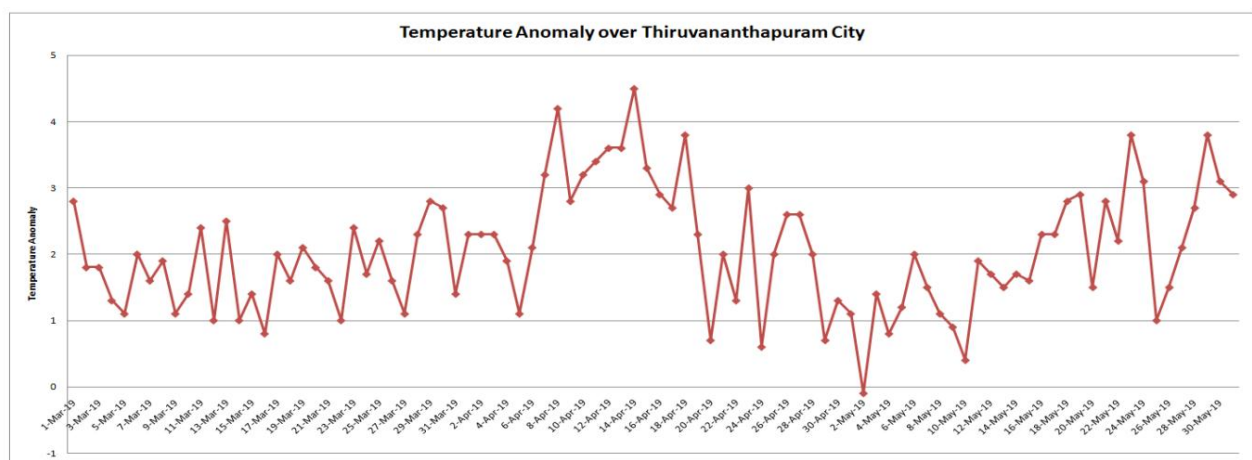

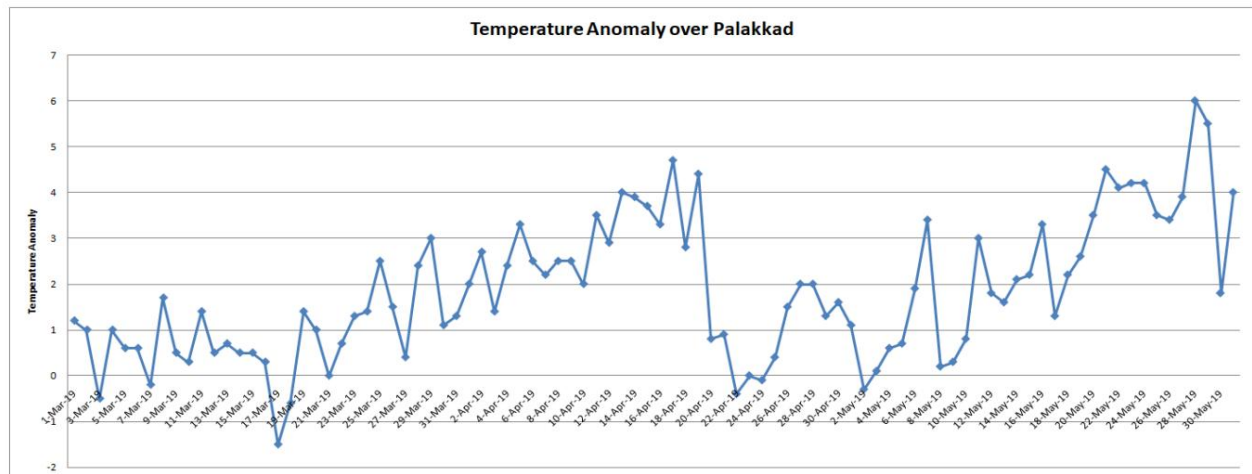

The temperature in the coastal areas has risen to 37°C.

More often than not, from normal temperature

The temperature is expected to rise by 4.5°C or more, indicating a heat wave in the region.

Station Name	Highest Max Temp recorded		Lowest Temp recorded	
	Date	MaxT (°C)	Date	MinT (°C)
Kozhikode	01-05-2016	39.2	15-12-2002	18.8
Kannur	28-04-2016	39.2	26-12-2011	16.1
Karipur AP	05-04-1998	38.6	27-01-2003	11.2
Palakkad	27-04-2016	41.9	06-02-1989	15.8
Vellanikkara	26-03-2019	40.4	26-12-2007	16.6
CIAL Kochi	19-03-2014	38.1	08-02-2006	14.8
Alappuzha	15-05-1997	39.9	17-12-2004	13.8
Naval Air Station Kochi	04-04-1998	38.6	14-01-1990	17
Punalur	30-03-1992	40.6	20-01-1990	15.3
Kottayam	09-03-2004 & 27-03-2019	38.5	14-02-2005	16
Thiruvananthapuram City	04-04-2007	38	11-12-2003	18.5
Thiruvananthapuram Airport	29-04-2018	37.8	05-01-1993	17.4

The situation is such that they have one subdivision and two states for two consecutive days. This is also the time when the criteria are met. Heat waves are usually accompanied by thunderstorms.

1.4 Urban Heat Islands

Nearby, a sparsely populated, green area
On the other hand, cities experience more heat.

Threshold temperature

A temperature of 36.5°C and a fever^{40%} occur.

In reality, the heat index will be 40°C. In the summer

If we consider the average minimum humidity during the day (except in coastal districts) as 40%, the heat we experience or

The temperature needs to reach 36.5°C to reach the uncomfortable 40°C mark. The daytime ambient temperature is also 37°C.

The heat experienced in conditions with 50% humidity can reach a dangerous 46°C.

Daily atmosphere in Dhaka in the absence of previous experiences
The questions of gratitude begin when the heat is on.

It is possible to scientifically determine and make a 'threshold value' determination.

It takes years to draw conclusions. More

Experience-based, well-rounded information

Studies are necessary. Therefore, the hot and humid weather in Dhaka

The 'threshold temperature' for providing information on the question of respect is the temperature at which the heat index can reach 40°C.

To be determined temporally as a temperature of 36.5°C

It has been decided. The temperature rises to 38°C.

The dangerous phase is also known as the extremely high 40°C alert phase, when the daily ambient temperature reaches a high level.

It is estimated

that the temperature will be 2 to 4°C below normal during the monsoon season.

State Disaster Management Office, which provides warning and repentance

The authority will issue a weather advisory. The temperature will remain below 4.5°C for 2 consecutive days.

On occasion, the situation of violence is inevitable.

Extreme vigilance in the state as heatwave warning issued

The solution is to remove the problem.

1.7 UV Index

The 2019 Annual Meeting of the International Society for the Advancement of Science and Technology (IDSP) was held in the presence of the President of the Republic of Indonesia. 875 of the questions were about Sunburn. See. The Milky Way coming from the Sun to Earth. The rays penetrate the body more deeply. Sunburn is common in the United States. Devastating It is helpful to understand the meaning of ultraviolet rays. The UV Index is an index. It is usually on a scale of 1 to 11.

UV ink is used as a dye. In Indian culture The Alta Vista Index is rising above 7. Dangerous. Easy to handle. It is possible. UV index rises above 9. It will become a very serious incident. Valsara Sapsattanna Tasanna There will be an increased risk of sunstroke.

A practical system for measuring UV index in Dhaka The UV index is being updated to reflect the current weather conditions. The 14 GLA L. This headquarters in Dhaka are undergoing a process of de-escalation. UV Index meters that measure ultraviolet index State Disaster Management Authority to be established Decided by. State Disaster Management Authority during the monsoon season The authority also provides social media through its official website. UV inks through media and 14G Lakalida The news about the incident is making the people of Sapthu scared.

2 Heatwave Disasters and Climate Change Tired

in the states where the heatwave is most dangerous in India, and the
heatwave is expected to continue. Plan Be prepared.

The death toll in the state seems to be decreasing significantly. In the
changing climate, the government has been working hard to save lives.
It takes courage to be prepared and prepared. This is Tasanna.
It also points to the need for a comprehensive action plan.

(Weather) warnings for all weather-related disasters
Responsible agency to provide. Regarding the heat wave
Provides real-time temperature information and warnings

The state of affairs is changing. The state of affairs is changing from the state of affairs.

The dire warnings have been translated into Malayalam.
Necessary safety and preparation instructions are provided by the state.
The Disaster Management Authority is the authority that provides relief to the people in Dhaka and other places.
It also reaches government systems.

The main reason is the condition of the liver, which is very sensitive.
The terms temperature and heat index are related.
The state of Kerala is preparing for a heatwave.
The Disaster Management Authority is responding.

3.2 Kepra's climate predictions

There are four types of sentences that describe the state of affairs.
It is associated with heat.

A. Seasonal Range - The average temperature for the next three months
This is a warning no matter what type it is. Before the start of the
hot season (March to September)

This usually occurs in the case of a severe case of a disease. Usually,
these are the words that are pronounced as Dakshidanantayakasaka.
At this stage, the condition of the fetus is usually given.

The fetus is afraid of the mother. B. L.

Extended Range - The next 3 weeks are the most likely to develop.

Regarding heat and low temperature

The information is the condition of this field.

Be afraid. Expectations from normal temperature

The state-level

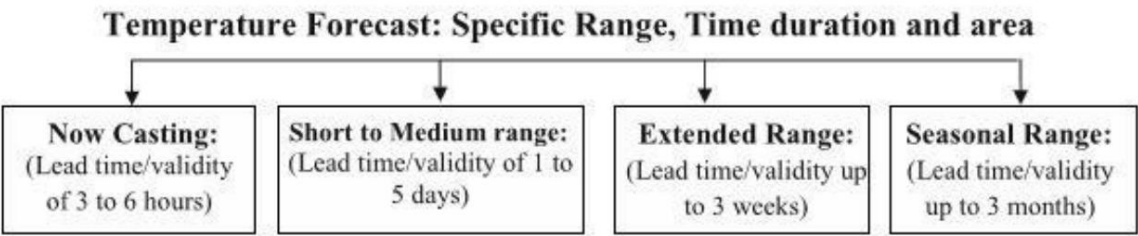

This is the fear of the future.

C. Short to Medium Range - 24 hours to 5 days

These are the current quotes. For the next 5 days
The medium includes temperature information from the glacier.
For the sake of the people. For disaster management systems
For those who are usually more compassionate,
This is it.

D. Nowcast - Current events for the next 3 to 6 hours

The weather conditions are the same as the weather forecast.
Be afraid.

The condition of the brain is a complex and complex system.

6 Heatwave Disaster Relief Measures

Heat waves are the most common and likely to intensify natural disasters in the 21st century. Heat waves and their attendant heat waves and wildfires are spreading across the globe. There is an urgent need for international and regional action to combat this threat. Urbanization, population growth, increasing vulnerability to climate change, and the effects of climate change are all contributing to the urgent need for effective heat wave mitigation and response systems.

From the moment of conception Leading Reasons
Although it is possible to hear a similar phrase on the basis of the original
Our role is to fulfill our responsibility.
A balanced and balanced society is a key responsibility. From our policy formulation
and development plans to our daily lives, we need to take into account the climate
change. It is imperative that measures to improve the climate change are included
To be seen Renovations in the government's
development plans. The long-term plan to control carbon emissions from the
atmosphere and promote green growth is the most important one that needs to be
started urgently.

A comprehensive study is needed to mitigate the heat wave.
Preparations and interventions are needed that are in line with the
geography of the country, the changing climate, and the sensitivity
of the people. Atsakand Thasanna

There should be studies to establish a basis for this. It is necessary to study the temperature threshold, or the temperature at which a disease develops in the body, and to develop an index based on the criteria. Danger

6.1 Phasavenai Projects

to further identify and provide basic care to these groups. For this, social volunteer programs and basic care methods should be developed.

2. Conduct a public awareness campaign to create awareness about heat wave and the importance of drinking water to maintain body temperature. 3. Instill a sense of security in all the districts. For this, establish water stations.

Provide facilities at all the places where water is available and provide such facilities at the places where tankers are available. 4. Provide clean water to the people. Such

The winds are blowing,

8 Appendix 1: Government Order declaring heat wave, solar eclipse, solar heat wave as a state of emergency

GOVERNMENT OF KERALA

Abstract

Disaster Management Department-State Disaster Response Fund Norms -State Specific Disasters-Heat wave, Sun stroke, Sun burn-Notified- Orders issued

DISASTER MANAGEMENT(B) DEPARTMENT

G.O.(Ms)No.9/2019/DMD Dated,Thiruvananthapuram, 09/03/2019

Read 1 Letter No. 32-7/2014-NIDM-I dated 8-4-2015 from the Disaster Management Division, Ministry of Home Affairs, Government of India

 2 GO (Ms) No. 194/2015/DMD dated 20-05-2015

 3 Minutes of the State Executive Committee meeting held on 06-03-2019

ORDER

Government of Kerala had revised the norms of relief assistance from State Disaster Response Fund (SDRF) to the victims of natural calamities for 2015-20 in accordance with the recommendations of 14th Finance Commission (FFC) approved by Government of India, Ministry of Home Affairs as per Government Order read as 2nd paper above. As per the revised norms issued by Government of India vide letter read as 1st paper above, it has been permitted to use 10% of the annual SDRF/NDRF allocation for relief assistance to 'State Specific Disasters' within the local context of the State and instructed that such local disasters and the relief assistance norms have to be declared and approved by the State Executive Committee (SEC) of State Disaster Management Authority (SDMA).

2. Accordingly the SEC has declared the following items as State Specific Disaster and approved the norms for relief assistance as given as Annexure to this order.

- a) Heat Wave
- b) Sun Stroke
- c) Sun Burn

3. Government have examined the matter and are pleased to order that the norms and scale of assistance declared and approved by the SEC of KSDMA and given as annexure to this order will be followed for providing relief assistance to victims of State Specific Disasters in the State.

ANNEXURE

**List of items and norms of assistance from State Disaster Response Fund (SDRF)
for Heat Wave, Sun Stroke, Sun Burn**

Item	Revised for 2015-2020
1 a) Ex-gratia payment to families of deceased persons	4,00,000/-
1 b) Ex-gratia for loss of eye(s)	40% to 60% loss – 59,100/- >60% - 2,00,000/-
1 c) Grievous injury requiring hospitalization	More than a week - 12,700/ Less than a week - 4,300/-
2 a) Cost of evacuation of people affected/likely to be affected	As per actual cost based on assessment of need by DDMA up to 60 days limited to the funds specifically provided for this state specific disasters, and may be extended upto 90 days with the approval of Government.
2 b) Hiring of boats for carrying out immediate relief and saving lives	As per actual cost based on assessment of need by DDMA up to 60 days limited to the funds specifically provided for this state specific disasters, and may be extended upto 90 days with the approval of Government.
3 a) Provision for temporary accommodation, food, clothing, medical care, etc. for people affected/evacuated and sheltered in relief camps.	As per actual cost based on assessment of need by DDMA up to 60 days limited to the funds specifically provided for this state specific disasters, and may be extended upto 90 days with the approval of Government.
3 b) Provision of emergency supply of drinking water in rural areas and urban areas	As per actual cost based on assessment of need by DDMA up to 60 days limited to the funds specifically provided for this state specific disasters, and may be extended upto 90 days with the approval of Government.
4 Disposal of dead bodies/carcasses	As per actual cost based on assessment of need by DDMA limited to the funds specifically provided for this state specific disasters.

6 Replacement of milch animals, draught animals used for haulage	Milch animals - 30,000/- (Buffalo/cow/camel/yak/mithun) Sheep/goat/pig – 3000/- Draught animals - 25000/-camel/horse/bullock, etc. Poultry-50/-per bird 16,000/calf/donkey, pony, mule
Repair restoration (of immediate nature) of damaged infrastructure. 1) Drinking Water Supply	As approved by the DDMA, upto Rs. 25,000/damaged structure which is exclusively used for drinking water supply
- Expenses for responding to Heat Wave, Sun Burn and Sun Stroke shall be limited to the amount allotted exclusively for the purpose from the Government from time to time. No additional burden shall be taken-up without the prior approval of the Government - Detailed Circular will be issued by the Government for utilization of funds provided to respond to Heat Wave, Sun Burn and Sun Stroke, from time to time.

സൂര്യാഘാത ലക്ഷണങ്ങൾ

- സൂര്യാഘാതം മൂലം 104°F -ൽ കൂടുതൽ ശരീരോഷ്മാവ് ഉയരുക, ചർമ്മം വരണ്ടു പോകുക, ശ്വാസന പ്രക്രിയ സാവധാനമാകുക, മാനസിക പിരിമുറുക്കമുണ്ടാകുക, തലവേദന, മസിൽ പിടുത്തം എന്നിവയുണ്ടാകുക, കൃഷ്ണമണി വികസിക്കുക, ക്ഷീണം, ചുഴലിരോഗ ലക്ഷണങ്ങൾ, ബോധക്ഷയം എന്നിവ കാട്ടുക.
- ചൂടിന്റെ ആധിക്യം (Heat Exhaustion) മൂലം ക്ഷീണം, തളർച്ച, മസിൽ പിടുത്തം, ഓർക്കാനം, ഛർദ്ദി, കുറഞ്ഞ / കൂടിയ നാഡിമിടുപ്പ്, അസാധാരണമായ വിയർപ്പ്, മന്ദത, ബോധക്ഷയം, മൂത്രം കടുത്ത മഞ്ഞ നിറമാകുക, വയറിളക്കം എന്നീ ലക്ഷണങ്ങൾ.
- താപഘാതം (Heat Stroke) മൂലം കൂടിയ നാഡിമിടുപ്പ്, ശ്വാസിക്കാൻ പ്രയാസം, വിയർപ്പിന്റെ അഭാവം (വിയർക്കാതിരിക്കുക) ചർമ്മം ചുവന്ന് തടിക്കുക, പൊള്ളലേൽക്കുക, മാനസിക പിരിമുറുക്കം എന്നീ ലക്ഷണങ്ങൾ.

ആർക്കാണ് സൂര്യാഘാതമേൽക്കാൻ സാധ്യത കൂടുതൽ

- കടുത്ത ചൂടുമായി നേരിട്ട് ശാരീരിക സമ്പർക്കം പുലർത്തുന്ന വ്യക്തികൾ താഴെ പറയുന്ന വിഭാഗത്തിൽ വരുന്ന വ്യക്തികൾക്ക് പ്രത്യേക മുൻകരുതലുകൾ എടുത്തിരിക്കണം :
- കുട്ടികൾ, പ്രായമായവർ, വിവിധങ്ങളായ അസുഖമുള്ളവർ (രക്തക്കുഴൽ ചുരുങ്ങൽ, ഹൃദയത്തിന്റെ പ്രവർത്തനശേഷിക്കുറവ്, പ്രമേഹം, ത്വക്ക് രോഗം) ജന്മനാ സ്വേദഗ്രന്ഥികളുടെ അഭാവമുള്ളവർ
- കർഷക തൊഴിലാളികൾ, കെട്ടിട നിർമ്മാണ തൊഴിലാളികൾ, മറ്റ് പുറം വാതിൽ ജോലികളിൽ ഏർപ്പെടുന്നവർ
- കായിക പ്രവർത്തനങ്ങളായ അത്ലറ്റിക്സ് (ക്രിക്കറ്റ്, സൈക്കിളിങ്ങ് എന്നിവയിൽ ഏർപ്പെടുന്നവർ)

പ്രതിരോധ മാർഗ്ഗങ്ങൾ

- കടുത്ത ചൂടിനോട് ദീർഘനേരം ശാരീരിക സമ്പർക്കം ഒഴിവാക്കുക.
- ശുദ്ധ ജലം ധാരാളം കുടിക്കുക. ദിവസത്തിൽ 8 ഗ്ലാസ്സ് വെള്ളമെങ്കിലും കുടിക്കുക. ദ്രവരൂപത്തിലുള്ള ആഹാര പദാർത്ഥങ്ങൾ കഴിക്കുക, നിർജ്ജലീകരണം ഒഴിവാക്കുക, ദാഹം തോന്നാതെ തന്നെ ഇടക്കിടെ വെള്ളം കുടിക്കുക.
- നനച്ച തുണിവിഴിഞ്ഞ് ശരീരം തുടക്കുക.
- ശരീരം പൂർണ്ണമായി കാര്യക്ഷമമല്ലെങ്കിൽ ശാരീരികാധ്വാനം ഉള്ള പ്രവൃത്തികൾ ഒഴിവാക്കുക.
- പുറം വാതിൽ പ്രവൃത്തികൾ ചെയ്യുമ്പോൾ ധാരാളം വെള്ളം കുടിക്കുക, ഇതോടൊപ്പം ഇടക്കിടെ വിശ്രമിക്കുക.
- എല്ലാ പ്രവൃത്തികളും ദിവസത്തിലെ ചൂടുകുറഞ്ഞ സമയം നോക്കി ക്രമീകരിക്കുക. ശാരീരികാധ്വാനമുള്ള പ്രവൃത്തികൾ ഉച്ച സമയത്ത് ചെയ്യാതിരിക്കുക.
- കഫീൻ, മദ്യം മുതലായവ ഒഴിവാക്കുക. ഇവ നിർജ്ജലീകരണത്തിന് കാരണമാകാം.
- കട്ടികുറഞ്ഞ ഇളം നിറത്തിലുള്ളതും അയഞ്ഞതും കാലാവസ്ഥക്ക് അനുയോജ്യമായ തുമ്പായ വസ്ത്രങ്ങൾ ധരിക്കുക. കോട്ടൺ വസ്ത്രങ്ങളാണ് ഏറ്റവും അഭികാമ്യം.
- സൂര്യപ്രകാശവുമായി നേരിട്ടുള്ള സമ്പർക്കം ഒഴിവാക്കാനായി കൂട ഉപയോഗിക്കാം. സൺഗ്ലാസുകൾ / ക്ലിംഗ് ഗ്ലാസുകൾ ധരിക്കുന്നത് കണ്ണുകൾക്ക് ചൂടിൽ നിന്നും സംരക്ഷണം നൽകും.
- വീട്ടിൽ വായു സഞ്ചാരം കൂട്ടുന്നതിന് ജനാലകൾ തുറന്നിടുകയും ഫാൻ ഉപയോഗിക്കുകയും ചെയ്യാം. പോഷക മൂല്യമുള്ള ഭക്ഷണം കഴിക്കാൻ ശ്രമിക്കുക.

ഉടനടി ചെയ്യേണ്ടത്

- രോഗിയെ തറയിലോ / കട്ടിലിലോ കിടത്തുക.
- ചൂട് കുറയ്ക്കാൻ ഫാൻ ഉപയോഗിക്കുക.
- കാലുകൾ ഉയർത്തി വയ്ക്കുക.
- വെള്ളത്തിൽ നനച്ച തുണി ദേഹത്തിടുക.
- വെള്ളം / ദ്രവ രൂപത്തിലുള്ള ആഹാരങ്ങൾ നൽകുക.

💧 Water Conservation Begins @ Home 💧

Heat Wave DO's and DON'Ts

DO's

Must for All

- Listen to Radio; watch TV; read Newspaper for local weather news.
- Drink sufficient water - even if not thirsty.
- Use ORS (Oral Rehydration Solution), homemade drinks like lassi, torani (rice water), lemon water, buttermilk, etc. to keep yourself hydrated.
- Wear lightweight, light-coloured, loose, cotton clothes.
- Cover your head: Use a cloth, hat or umbrella.

Employers and Workers

- Provide cool drinking water near work place.
- Caution workers to avoid direct sunlight.
- Schedule strenuous jobs to cooler times of the day.
- Increasing the frequency and length of rest breaks for outdoor activities.
- Pregnant workers and workers with a medical condition should be given additional attention.

Other Precautions

- Stay indoors as much as possible.
- Keep your home cool, use curtains, shutters or sunshade and open windows at night. Try to remain on lower floors.
- Use fans, damp clothing and take bath in cold water frequently.
- If you feel faint or ill, see a doctor immediately.
- Keep animals in shade and give them plenty of water to drink.

DONT's

- Avoid going out in the sun, especially between 12.00 noon and 3.00 p.m.
- Avoid strenuous activities when outside in the afternoon.
- Do not go out barefoot.
- Avoid cooking during peak hours. Open doors and windows to ventilate cooking area adequately.
- Avoid alcohol, tea, coffee and carbonated soft drinks, which dehydrates the body.
- Avoid high-protein food and do not eat stale food.
- Do not leave children or pets in parked vehicles - as they may get affected by Heat Wave.

10.7 Kerala State Heat Disaster Disaster Management Authority Timeline

1. On 29-07-2019, the Hazard Analyst (Meteorology) vide file number DM/486/2016/ KSDMA sought permission to prepare a State Heat Action Plan (HAP) for the State and the approval was granted by the SEOC on 30/07/2019. Based on this, the studies and related activities for HAP have been initiated.
2. 22-10-2019 On states Four The National Disaster Management Authority has sent a letter to the state authorities, Letter No.F.No 1-79/2019-PP, requesting them to prepare action plans.
3. HA MET participated in the two-day National Disaster Management Authority (NDMA) Dry Disaster Preparedness Workshop held in Bengaluru on 5-6 December 2019. The workshop provided detailed discussions on the National Disaster Management Authority (NDMA) guidelines and provided training for preparedness.

State HAP Cul
4. The State Emergency Management Agency has prepared a draft of the 'Kerala State Heat Disaster Response Guidelines-2020' in Malayalam, the official language, in accordance with the guidelines of the National Disaster Management Authority.
It was finalized on January 7 and submitted for internal review by SEOC experts. It was sent to experts with expertise and experience in the fields of climate change and disaster management on February 15 for comments.
These experts

The draft was revised on 26th February 2020 by incorporating the comments. 5. Draft of 'Karnataka State Heat Disaster Response

Framework-2020' for the consultation and comments of the concerned departments of the State on 2nd March 2020

Sent via e-mail on.

6. Consultation Meeting on the Kerala State Heat Disaster Response Framework was held at the headquarters of the State Disaster Management Authority in Marimat, 2020, with the participation of representatives from various departments.

Held on March 05. The participants in the Kspatuta Dayaga

The information about the representatives is given below.
